

Poltair | Computer Science - Year 11 - 2024/25

The Plan for Year 11 in their CS Lessons

Lessons will be skills based, covering key exam techniques to ensure students know exactly what to expect in their GCSES

This term we will focus on developing coding skills, using files, databases, searching and sorting algorithms. After half-term we will begin revising all other themes learnt to date.

Throughout Year 11 we will ensure even coverage of the 2 GCSE strands (Computer Systems, Computational Thinking Algorithms and Programming) to ensure students are fully prepared for all aspects of the final exams.

GCSE ready

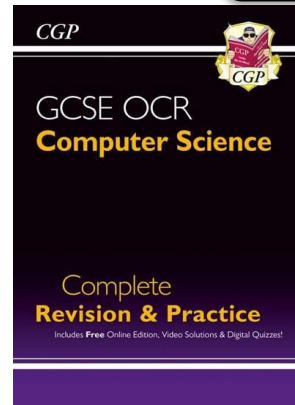

Attendance is key to success. It is proven students with attendance above 96% achieve a grade higher.

This term we will complete practice exams with detailed feedback on where students need to focus revision.

**PPE1 window =
18/11/24 to 29/11/24**

How to revise

At Poltair we **SORT** it!

The OCR J277 Computer Science Revision and Practice guide is available to order on the Parent Pay Shop.

Use the revision and practice guide along with different SORT strategies and online content to revise every week.

Hand your written work in to the teacher for them to give you personalised feedback.

Other revision resources
