Update for self-isolating students

Dear Parent,

You may be aware that the Government changed the guidance for self-isolation from 14 days to 10 days from the 14.12.20. As a result, we have consulted further with Public Health England whose advice is that all students in Year 11 should continue to self-isolate until the end of the 18th December. With two cases in the same year group within a short number of days, it is important that we reduce the potential for further transmission.

We appreciate that self-isolation causes frustration for students and parents but it is important that we follow guidance to protect our community.

Your child should continue to access the learning activities set by their teachers via ClassCharts. A guide to 'Learning from Home' and resources to support online work have been sent home to students.

If you have any questions regarding your child's work, please contact their form tutor or class teacher in the first instance. Email addresses can be found on the school website.

Yours sincerely,

Mark Everett
Head of School
